NOTE:

### Note

3-pins can be selected by cutting off unwanted pins using sharp wire cutters at the breakaway plastic indentions.

I like gold plating for long lasting contact quality. Other models can be selected on Amazon or Mouser websites.

Solder to short terminals, long terminal plug into paddle.

# Construction Notes

## Steps to Build Cable Assembly

- Cut your cable with the 1/8" (3.5 mm) TRS plug to desired length and strip wires.
- Prior to any soldering, prioritize having heat shrink in place prior to soldering! Easy to forget.
  - Slip larger (1/4") heat shrink tubing over cable and pull away from soldering end.
  - Pre-tin each wire for solder.
  - Pre-tin each connector pin.
  - Add (1/16") diameter heat shrink tubing over each wire prior to soldering.
    - Keep away from heat so it does not shrink during your soldering.
      - Some skill required.
      - You can use needle nose to absorb heat away from heat shrink tube during soldering.
    - Once wire all wires soldered to pins, heat shrink all tubing then pull larger tubing over all 3 pins and shrink
- Add dot of paint or label to define up orientation for 3-pin connector

## Tools & Materials

- Low wattage soldering iron with fine tip.
- 1/8" (3.5 mm) TRS plug common audio extension cable cut to desired length. Example used at this link:
  - [https://www.amazon.com/gp/product/B01D5H8JW0/ref=ppx\\_yo\\_dt\\_b\\_search\\_asin\\_title?ie=UTF8&psc=1](https://www.amazon.com/gp/product/B01D5H8JW0/ref=ppx_yo_dt_b_search_asin_title?ie=UTF8&psc=1)
- Straight, 3-pin header, 0.1 inch spacing (see prior page)
- Small (1/16") diameter heat shrink tubing. Example it of various diameters at this link:
  - [https://www.amazon.com/gp/product/B00A3HSTE4/ref=ppx\\_yo\\_dt\\_b\\_asin\\_title\\_o00\\_s00?ie=UTF8&th=1](https://www.amazon.com/gp/product/B00A3HSTE4/ref=ppx_yo_dt_b_asin_title_o00_s00?ie=UTF8&th=1)
- Larger (1/4") heat shrink tubing.
- Dot of paint or label to define up orientation for 3-pin connector.

# Completed Project

## My Notes

- 1/8" (3.5 mm) TRS plug common audio extension cable cut to desired length
- Flip the connector over to swap the dot and dash paddle assignments!
- Add dot of paint or label to define up orientation for 3-pin connector
